

## FB SOURCE- SUCCESS IS IN THE DOING!

Success is in the doing!

Hi there my name is Grace, and I am the co-founder owner and creator of Filipino Virtual Assistance.

Allow me to encourage you today to start working on your dreams in order for you to be successful. You may be the most intelligent person, the most educated and well-rounded person but unless you start doing something nothing will happen. You maybe embracing the word planning, setting goals or strategizing, but unless you start doing something, nothing will happen.

You may have the right network of people, the right support, the right training, the right coach, the right set-up, but unless you start doing something, nothing will happen.

Productivity is in the execution that's why in FVA we put so much emphasis on work, on doing, why, because the results will allow our students to be successful.

We know that enrolling in a course alone that's not make our students or graduate improve the quality of their life, it is when they learned a skills and be confident in doing it or in applying it when they have their clients later on, that's why we have a portfolio base courses so they have to

provide output, they have to provide portfolio in order to them to be certified or graduate.

We put so much incentive or benefits when they finish portfolios like free apprenticeship or free features when it comes to hiring opportunities.

When it comes to being an exemplary students, we put so much emphasis on the outcome, on the portfolio, on the outputs be we know that the results will allow our students to be successful because again, it is in the doing that there is success , it is in the doing and execution that everybody can achieved the goals and plans they placed on their hearts, not on the enrollment of any courses, not on the support alone, not on the video lessons but it is applying the things that we've learned , it is the doing , it is the execution that allow us to become successful.

If you have anything to achieve this year, it may be learning a new skill, starting a new business venture, it may be writing a book, playing an instrument , saving one million pesos, whatever the goal maybe, start working on it, start doing something, start applying the very technique that you need, or start applying the changes that you need in order for you to be successful because success is not found in desiring or planning alone, or even on a course alone, success is found in the doing.

That would be all, I will see you again in the next video. GOD BLESS YOU!
